

**An example of data gathering on the LfL dimension:
Connecting with Parent and Community Support**

At School G, a desire to understand the views of parents whose children were involved in reading interventions resulted in the beginnings of a series of questions for them. The following set is an extract from School G's early draft. How might these questions be improved?

Questions/prompts for parents

- Is my child improving in reading?

- My child's teacher communicates with me what she needs to do to improve.

- My child talks about the reading program he is involved in at school.

- I feel that the work my child does is appropriate for her.

- I have had an interview with my child's teacher this year about his reading?

- I feel I can approach my child's teacher to ask for assistance with her reading.
